The beauty of traditional
solid hardwood timber flooring

No other flooring material, natural or man-made, can match the lasting beauty and sheer durability of solid hardwood. Uni-Nail solid hardwood tongue and groove strip flooring has been used as an elegant floor covering for many years. With its warmth, style and elegance, this traditional flooring system is as popular today as it was in bygone centuries.

Uni-Nail profile

Uni-Nail is designed to be laid directly onto joists, battens over concrete, or even nailed to old timber flooring. Precision-milled to 19mm thick, the Uni-Nail profile is designed for a tight plank-to-plank fit. Tongue and groove joints on both sides and ends of the plank ensure a continuous and stable surface. The end matching, which is a tongue and groove on the ends of the boards, removes the need for ends to fall directly over a joist or batten. This results in less cutting and less waste.

Easy installation

Uni-Nail tongue and groove strip flooring is designed to be nailed down. Board widths up to 80mm can be secret-nailed into the tongue while wider boards up to 130mm are top-nailed. As any solid timber product will be effected by changes in the moisture content of the air, we recommend that Uni-Nail is acclimatised to its new environment for an appropriate time. Your new floor should then be professionally installed.

The beauty of Uni-Nail is that it can handle traffic as soon as it is laid, allowing for other trades to finish their jobs before a final sanding and application of the finish. For optimum performance, timber flooring should be installed when the area it is going into has reached its long term equilibrium moisture content. This will help minimise any movement in the boards.

Many applications

Uni-Nail can be used in the following flooring applications

- Nailed to battens over a concrete slab
- Nailed to timber joists over bearers
- Nailed to plywood over concrete or timber joists
- Nailed to old timber strip flooring over joists

Better for the environment

Timber is one of the world's few truly renewable natural resources.

The native hardwood that you buy from Boral Timber is sourced from a forest that is sustainably managed through a rigorous framework of both Commonwealth and State laws and regulations.

Species available

- | | | |
|--------------------|---------------|-----------------|
| • Alpine Ash | • Rose Gum | • Red Mahogany |
| • Australian Beech | • Forest Reds | • Spotted Gum |
| • Blackbutt | • Ironbark | • Tallowwood |
| • Sydney Blue Gum | • Jarrah | • Tasmanian Oak |
| • Brushbox | • Karri | • Turpentine |

Sizes available

- 60mm, 80mm and 130mm wide; 19mm thick
- Random lengths 900mm to 5400mm

Grades available

- Classic - minimal natural variations
- Australiana - beautiful variations in grain as well as natural features such as gum veins and insect trails
- Natural Grade – high in natural and machine features

Features and Benefits of Uni-Nail Flooring

- Solid hardwood floors are excellent for asthmatics as they do not harbour dust mites or other allergens
- The classic style of solid hardwood makes it virtually fashion-proof. A polished timber floor will look as stylish in 20 years' time as it does today
- Extremely easy to clean and maintain
- A long lasting floor covering that can be refinished many times
- The environmental choice – timber is one of the world's few truly renewable resources
- A timber sub-floor gives easy access to the underfloor for plumbing or ducted heating, or to repair wiring
- As with all solid hardwood timber floors, Uni-Nail is not recommended for bathrooms, laundries or other wet areas
- Comes with a Boral structural warranty when installed to Boral's specifications

The Beauty of Hardwood Timber Flooring from Boral

For generations, the distinctive beauty of hardwood timber flooring has brought warmth and elegance to Australian homes. Boral's timber flooring offers unique colours and grains to create a stunning feature in any home. And because of their excellent hardness, hardwoods are also ideal for commercial or civic developments.

Experience you can rely on

Boral Timber has been developing and producing wood flooring products for over a century. Today, Boral is one of the largest manufacturers of native Australian hardwood products and the industry leader in hardwood flooring. Boral's flooring products are produced at long-established mills at Maxwells Creek, north west of Newcastle, Murwillumbah near the NSW and Queensland border and Kyogle near Casino in northern NSW. Produced from the finest Australian native hardwood, Boral Timber Uni-Nail tongue and groove strip flooring is manufactured from carefully selected seasoned timber which has been kiln dried to provide the vital ingredients of strength and stability.

Quality Assurance

Boral Timber retains its position as market leader through a measured policy of Quality Assurance. The Boral Timber Quality Assurance Program ensures consistently high product quality across the entire product range. Boral Timber was the first timber producer in Australia to comply with ISO 9002.

Other timber flooring products available from Boral Timber

- Slimwood Overlay Flooring
- George Hudson Block Parquetry Flooring
- George Hudson Mosaic Parquetry Flooring

Hardwood Timber

Boral Timber supplies native hardwood timbers for use in furniture and joinery manufacture, external decking, bridging timber and other decorative and structural applications.

Note: Variations of colour within a timber species are normal, therefore photographs can only be indicative of the colour range of the timber species nominated.
